PSD 40 - Shaft 14 mm hollow

· Software features: spindle compensation drive, increased breakaway performance, synchronized run

· Software modules for IO-Link: changeover of parameter set, target speed in process data and modulo function

- · Protection of internal electronics against manual operation
- · Space-saving, compact design
- · Optional rotatable actuator housing
- · Galvanically separated supply voltages between control and motor and bus
- · Precise position feedback thanks to an absolute
- measurement system without battery
- · Optional gearbox for more torque

· Address may be set using the bus or an address switch (not for IO-Link)

· Status LEDs visible from the outside

Self-holding torque below at approx. 60 mA supply current and 0.5 A phase current, currentless 0 Nm.
