

Linear Unit CTV 110

The CTV series describes linear units with a precision ball screw drive and two parallel, integrated, zero backlash rail guides. In the linear units CTV a precision ball screw, with tolerance class ISO7 (ISO5 on request), with reduced backlash of the ball nut is used.

Two parallel circulating antistatic polyurethane sealing strips and an aluminum cover are ensuring to protect all the parts in the profile from dust and other contaminations. Re-lubrication can be done through maintenance holes on the side of the profile.

Modulus of elasticity: $E = 70000 \text{ N / mm}^2$
Operating Temperature (°C): $0 \sim +60$ For operating temperature out of the presented range, please contact Rollco.
Duty cycle: 100%

1. Drive block with floating bearing
2. Gap-type seal of antistatic PU strip (recirculating)
3. Ball screw tolerance ISO7 (ISO5 available on request)
4. Carriage; with built in magnets
5. Aluminium cover
6. Aluminium profile - hard anodized
7. Two integrated linear ball guideways
8. Central lubrication port, both sides
9. End block with fixed bearing

Deflection of the linear unit

CTV

Fixed - fixed mounting

- delta: Maximum deflection of the linear unit [mm]
- delta_max: Maximum permissible deflection of the linear unit [mm]
- F: Applied force [N]
- Lp: Unsupported profile length [mm]

Fixed - free mounting

The maximum permissible deflection (delta_max) must not be exceeded. In the case that maximum deflection delta exceeds the maximum permissible deflection (delta_max) additional profile supports are needed.

Deflection of the linear unit

CTV 110

① The linear units do not include any safety stroke. Absolute stroke = Effective stroke + 2 x safety stroke.

① Journal with or without keyway ② All dimensions in mm. Drawings scales are not equal.

① The linear units do not include any safety stroke. Absolute stroke = Effective stroke + 2 x safety stroke.

* Lubrication port position:
 Long carriage: L/2
 Short carriage: L/2 - 39 mm

① Journal with or without keyway ② All dimensions in mm. Drawings scales are not equal.

① The linear units do not include any safety stroke. Absolute stroke = Effective stroke + 2 x safety stroke.

① Journal with or without keyway ② All dimensions in mm. Drawings scales are not equal.

Linear Unit CTV 110

① Journal with or without keyway. ② All dimensions in mm. Drawings scales are not equal.

Defining of the linear unit length

$$L = \text{Effective stroke} + 2 \times \text{Safety stroke} + L_v + 51 \text{ mm}$$

$$L_{\text{total}} = L + 74 \text{ mm}$$

L_v - Long carriage = 124 mm
 L_v - Short carriage = 39 mm

$$L = \text{Effective stroke} + 2 \times \text{Safety stroke} + A + 90 \text{ mm}$$

$$L_{\text{total}} = L + 74 \text{ mm}$$

} $A \geq 85 \text{ mm}$

Double-Carriage

① Only with short carriage version.

② For ordering code please contact Rollco.

Connection plate

Mounting the drive

- by the MOTOR SIDE DRIVE - MSO
 - by the MOTOR ADAPTER WITH COUPLING
- Available on request

Linear Unit	Plate length (mm)	Weight (kg)	Code
CTV 110 S	80	0,37	40340
CTV 110 L	155	0,74	40340

Mounting elements for mounting the connection plate on the linear unit are included.

Maximum travel speed as a function of the profile length (vmax - L curves)

CTV 110

Variant Data

For length/stroke over the stated value, please contact Rollco. Values for max. stroke are not valid for double carriage (equation of defining the linear unit length for particular size of the linear unit needs to be used).

Recommended values of loads

All the data of static and dynamic moments and load capacities stated are theoretical without considering any safety factor. The safety factor depends on the application and its requested safety.

We recommend a minimum safety factor ($f_s = 5.0$).

Drive data

Max. travel speed depends of the length of the linear unit, see diagram for particular size of the linear unit. For travel speed over the stated value, please contact Rollco.

The stated values are for strokes up to 500 mm. No load torque value increases with stroke elongation.

For the ball nut with the preload of 2%, please contact Rollco.

For minimum stroke below the stated value, please contact Rollco.

Max. acceleration (m/s²): 20

For acceleration over the stated value, please contact Rollco.

Reduced effective diameter at journal with keyway decreases values of max. drive torque. See Max. Drive torque values in table below.

Designation	Max. Travel Speed (m/s)	Max. Rotational Speed (rev/min)	Max. Drive Torque Ma (Nm)	Lead Constant (mm/rev)	No Load Torque Carriage S (Nm)
