

PSD 40 - Shaft 5 mm solid

- · Software features: spindle compensation drive, increased breakaway performance, synchronized run
- Software modules for IO-Link: changeover of parameter set, target speed in process data and modulo function
- Protection of internal electronics against manual operation
- · Space-saving, compact design
- · Galvanically separated supply voltages between control and motor and bus
- · Precise position feedback thanks to an absolute measurement system without battery
- · Optional gearbox for more torque
- · Address may be set using the bus or an address switch (not for IO-Link)
- · Status LEDs visible from the outside

Self-holding torque below at approx. 60 mA supply current and 0.5 A phase current, currentless 0 Nm.

Dimensions in mm.

See link Manual(s) for documentation and software.

Type: Horizontal

Nominal Torque (Nm): 0.8 Nominal Speed (rpm): 200

Nominal Voltage (V DC): 24 (± 10 %)

Nominal Current (A): 2.0 Output Shaft (mm): 5 Output Shaft Type: Solid

Rotation Shaft / Housing: Direct or 0°

BUS Communication: Can Open (CA); IO-Link (IO); ProfiNet (PN); EtherCat (EC); Ethernet IP (EI)

Electrical connection: 0: Standard

Protection Class: IP50; IP65

Motor: Stepper motor

Supply Voltage: 24 V DC ± 10 % galvanically separated

between motor and control

Measurement System: Absolute without battery Accuracy: "±0.7° for versions with gearbox; ± 1.8° for

versions without gearbox"

Intermittence: Start-up duration up to 50%

Manual Adjustment: No

Brake: No

PSD 40 - Shaft 5 mm solid

Performance Curve - Direct Drives PSD

General Data

PSD 401-5V (solid shaft)

Designation	Nominal Torque (Nm)	Nominal Speed (rpm)	Nominal Current (A)	Self-holding Torque (Nm)	Max. Speed (rpm)
PSD 401-5V	0.8	200	2.0	0.4	800

Designation	Positioning Range (rot.)
PSD 401-5V	4026
