PSS 33 - Shaft 14 mm solid

- · Positioning system with IP 65
- · Absolute measuring system, without battery

• Galvanically separated supply voltages between control and motor and bus

• Absolute encoder eliminates the need for reference runs during system setup and installation of replacements

• Easy address assignment directly on the device using

integrated address switches (not for IO-Link)
Manual disconnecting lever permits manual

disconnection of the gearbox

Regulation of the current torque prevents overloading and unnecessary run aborts

• Strong breakaway torque enables safe start-up even after an extended standstill

• Intelligent running behaviour. Recognises the difference between obstacles and dirt

• Spindle offset run: Excludes inconsistencies due to lash in the spindle.

• Condition monitoring of supply voltage, drag error (permits optimum adjustment of current position), power consumption and torque

• Partial safety function for STO (Safe Torque Off)
