

Support units and recommended screw-shaft diameters

Screw Dimension (d0 x Lead)

[illegible]

	Standard combination. CAD and configurator supported.
	Useful alternative combination. No CAD and configurator support (customer drawing required).
	The use of BKN20 or FKN20 on size 2510 requires a press-fitted spacer to create enough axial support.
	Not recommended combination.
	Impossible combination.
